

## **T10M4 Harvesting Principles**

### **List of Substances, Drugs and Anesthetic Medications**

The purpose of harvesting is to:

- get the basics of how to identify the imprints, what the experience is for baby and mom, what to do about it;
- develop an approach to evaluating and being with people who have drug imprints.
- attend to what trainees have in their experience.

With this in mind, we do not intend to cover every drug.

When we have covered the basic purpose then we move on to the next drug.

\* = We have videos or slides to show.

#### **Labor and Birth**

##### **Induction**

Herbs

##### **Pit extracts**

Castor oil

Quinine

**Pitocin \***

**Cytotec (misoprostal)**

##### **Pain Management**

##### **Opiates**

**Demerol**

**Meperidine**

**Morphine**

morphine face;

**Fentanyl**

##### **Gases**

**Ether**

**NO3**

Blocks\*Slides showing

Blocks

Pudendal

Cervical

Epidural

Spinal Cherrisse

Video

Medical Video

##### **Amnesiacs**

Scopolomine\*

Cocktails

Thalidomide

Diethylstilbestrol (DES)

Phenergan: as sedative; is an

antihistamine

Terbutaline

Zofran: Nausea

##### **Recreational Drugs**

Alcohol ETOH

FAS

Nicotine

Caffeine

Marijuana

Cocaine

Ecstasy

Opiates

Barbiturates Slows

Amphetamines Speeds

Meth Speeds

##### **Hallucinogens**

LSD

Peyote Cactus

High doses

Mushrooms

Ayahuasca

#### **Pregnancy Drugs**

Abortion drugs
